One  
**TPG**

Three brands.  
One mission.

Founded in 2018, the TPG group of companies combines specific expertise, an outstanding technology base and an expanded global network. With over 150 years of combined experience, we help you find your individual packaging solution. In addition, we help you meet global environmental challenges without compromising on performance.

We firmly believe: Sustainability and performance should go hand in hand!

With TPG, you get your packaging solution from a single source! Let's talk.

## **FAWEMA**

A world leader in free-flowing, dry products for over 100 years. Whether powder, granulate or piece goods, we supply packaging machines according to your individual requirements. FAWEMA can provide packaging from 500 g to 25 kg. The performance range is 20-110 bags/min.

## **HDG**

Since 1985 HDG has been meeting the needs of the modern market for high quality packaging machines. HDG is a leading manufacturer of form, fill and seal systems for side-sealed and stand-up pouches between 0.5 g and 5 kg.

## **WOLF**

For more than 30 years, WOLF has been supplying stand-alone machines and turnkey projects with technical flexibility. As an expert in vertical form fill and seal packaging from 5 g to 10 kg, more than 4,000 machines have been installed worldwide.

# Sustainability & Career

TPG 2021  
Sustainability Report

## Responsibility for people and the environment.

As a global company, we make a significant contribution to shaping a more sustainable world through our own actions. Products, people and planet - these are the pillars that comprise our sustainability approach.

### Sustainability Report 2021

Take a look at our Sustainability Report 2021 and learn more about milestones already achieved. These include laying the foundations for our commitment to carbon neutrality by 2030, expanding our innovation pipeline, and meeting customer needs following a global pandemic and supply chain disruptions. We have worked hard to remain agile in this ever-changing environment and have placed our focus on sustainability because we believe it supports business continuity, risk management and more - today and for the long term.

# Product segments

Innovative bag designs and sustainable materials.

As a manufacturer of packaging machines that package a wide variety of products - from fine powders to coarser products, such as barbecue charcoal and cat litter, as well as liquids or pasty products - we understand exactly what each industry needs when it comes to packaging.

Driven by climate and environmental crises, the packaging industry is facing new challenges. Developing new solutions is crucial to meet these dynamics. We support you in achieving sustainable packaging solutions and thus enable the adaptation to this development.

# Bag types

If you can think it, we can pack it!

Safe, sustainable & conscious.

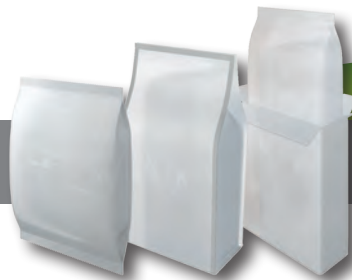

## Bag examples FAWEMA

Pre-made retail paper bags and bags weighing up to 25 kilograms can be sealed tightly in a variety of ways, from standard hot melt adhesive application to sewn closures.

## Bag examples HDG

The focus is on creating flexible packaging solutions that best meet the characteristics of a wide variety of products as well as your individual requirements.

## Bag examples WOLF

Whether classic flat or side gusseted pouches, 3-4 side sealed pouches, Stabil-Pack pouches or Doy-Style. Different bag head shapes, multiple folded head seam, sealed, glued or closed with a label. Doy-style bags with and without zip and bags with clip closure. Choose from a wide selection.

## Sustainable packaging materials

Developing new solutions is crucial to meet people's growing environmental awareness and sense of responsibility. We support you in achieving sustainable packaging solutions, such as paper packaging or bags made of mono-material, thus enabling you to adapt to this development. Let us talk about your products and determine the appropriate packaging solution.

# Machine types

Sustainability & efficiency combined in one machine.

We manufacture your individual machine solution with a long operational life.

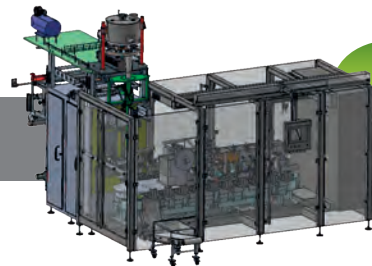

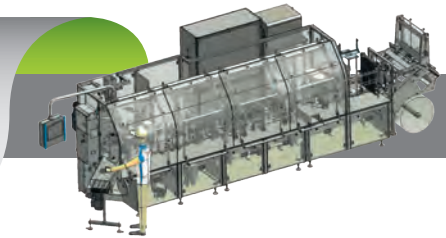

## FAWEMA FA217 bag filling and closing machine

The FA 217 is characterized by low power consumption and high packing performance. This is achieved by means of energy recovery in the electrical drive technology, as well as the low mechanical friction loss.

## HDG RB-200 high speed packing machine HFFS

The HDG-RB-200 belongs to the HDG premium line, which is characterized by both high performance and maximum flexibility regarding different formats, bag shapes and products.

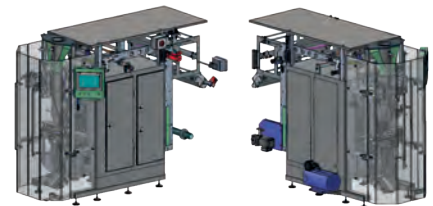

## WOLF KVM-S top sealing machine

With creative design options, top sealing machines offer true marketing flexibility for high sales impact on the shelf. Compact design and modular technology for outstanding profitability.

## Customized solutions without compromise

We develop not only individual components, but also complete production lines specifically tailored to your needs. Contact us and let us optimize your production processes together!

# Your satisfaction is very important to us.

Global yet local - we are here for you!

We work in close partnership with you to ensure that your machine achieves maximum availability with a long operational life. An outstanding service team is always available to help solve any problems.
